

TRENT EDWARDS

Data Analyst | SQL, Tableau & Operational Analytics

Puyallup, WA | (602) 705-1189 | Tleinaz@ymail.com

LinkedIn | GitHub | Tableau Public

PROFESSIONAL SUMMARY

Data Analyst with a background in mortgage operations, specializing in SQL-driven analysis and operational workflow data solutions to transform complex pipeline data into actionable operational insights. Experienced in translating business problems into structured queries, identifying risk drivers, and supporting prioritization and decision-making in metrics-driven and compliance-focused environments involving sensitive financial and non-public information (NPI).

TECHNICAL SKILLS

SQL (MySQL) | Tableau | Excel (Pivot Tables) | Python (Pandas) | Data Visualization | Dashboard Reporting | Workflow Analysis | Operational Reporting | KPI Reporting | Mortgage Operations | Business Process Support | GitHub | Tableau Public

ANALYTICS PROJECTS

Mortgage Pipeline Risk & Prioritization Analysis (SQL, Tableau)

- Developed an end-to-end mortgage pipeline risk analysis identifying aging loans, disclosure risks (LE/CD), and workflow bottlenecks impacting operational efficiency.
- Designed a repeatable SQL-based analysis framework transforming raw pipeline data into structured, actionable operational insights.
- Translated business questions into validated SQL logic aligned with real-world definitions of risk and urgency.
- Built dashboards highlighting priority tiers (Critical/High/Medium), loan aging, and key risk drivers for rapid decision-making.
- Leveraged AI-assisted workflows to accelerate analysis while maintaining accuracy and control.

Mortgage Loan Approval Analysis (SQL, Tableau, Python)

- Analyzed mortgage loan datasets across income levels, loan sizes, and geographic regions to identify approval trends and risk patterns.
- Performed data cleaning, transformation, and feature engineering using SQL and Python.
- Created segmentation models for income bands and loan size categories.
- Built Tableau dashboards to visualize approval trends and lending risk indicators.
- Identified higher approval likelihood among higher-income and lower loan-size segments.

RELEVANT PROFESSIONAL EXPERIENCE

loanDepot — Underwriting Support Specialist / Software Support | 2020–2022

- Provided operational and system support for mortgage underwriting teams in a high-volume environment.
- Collaborated with developers to resolve workflow and system issues impacting loan processing.
- Supported underwriting staff through troubleshooting, workflow guidance, and best-practice process support.
- Managed 20–30 daily support requests while meeting service-level expectations.

Bank of America — Client Advocate / Underwriter / SME | 2013–2016

- Supported underwriting operations through pipeline management, condition review, and appraisal approvals.
- Developed priority reports to track aging loans and workflow urgency.
- Led contractor onboarding workflow validation for loan file readiness.

- Maintained workflow continuity and supported team coverage during absences.
- Selected as SME to train vendor teams on mortgage workflows and best practices.

Caliber Home Loans — Business Analyst / Loan Processor | 2016–2017

- Managed daily mortgage pipeline and resolved workflow and system issues.
- Supported operational efficiency through coordination and issue resolution.
- Assisted with system upgrades and process transitions.
